

Parent Advisory Committee Questions

June 4, 2015 3:30 PM

Robertson Intermediate School

Goal 1: Technology

- Q. Regarding Technology Plan, will the test that the students will take be similar to what they are now doing in class?
- A. Yes, next year we will be taking two (2) of the SBAC Interim Assessments which are closely aligned to the Summative Assessment at the end of the year. Teachers will also be provided support on how to incorporate technology into their daily lessons versus a once a month model.
- Q. Will the students be taught coding, computer skills, etc?
- A. We are looking in to coding as an afterschool elective opportunity. Computer skills will be integrated in to regular lessons.
- Q. Will the implementation of all this technology take away from traditional writing?
- A. No, there is a combination of writing via Writers' Workshop and daily journaling, balanced by the use of computers to write, research, use applications, etc.

Goal 2: Facilities

- Q. Will we have a full time superintendent and business manager to ensure all projects are completed?
- A. Yes, both positions have been allocated beginning July 1, 2015.
1. You explained the advantage of having this technology available to the students because it gives the teachers the opportunity to have one-on-one time with the students who need it while the ones who understand the lesson can move on to practice what they learned).
